

# Trimble PULSE

## Video Intelligence to Protect Your Drivers

If a picture is worth a thousand words – a video is priceless. Trimble PULSE® Video Intelligence is a fleet dashboard camera solution that provides proof and protection for your drivers when incidents occur.

### Accurate Incident Capture

Forward and optional driver-facing cameras record throughout the day, with more than 40 hours of video footage stored on an in-vehicle DVR (Digital Video Recorder). This can be watched and analyzed remotely via Trimble PULSE should you need to get impartial evidence of incidents.

The footage removes any ambiguity from incident claims, thus protecting your drivers and your bottom line.

### Creating A Safe Driving Culture

Combining video review with Trimble PULSE driver scorecards provides a comprehensive safety solution. Live dashboards allow both trend and exception monitoring to identify those drivers who could be putting themselves and other road users at risk and offer training and advice to coach them to improve. Alongside this, safer driving dramatically reduces fuel costs and minimizes the impact on vehicle condition.

### Benefits

**Reduces claim settlement time and costs.**

**Resolves incident disputes quickly and minimizes driver downtime.**

**Exposes fraudulent claims and reinforces liability defence.**

**Minimizes impact on business reputation and revenue.**

# Features

## CAMERAS

- ▶ Forward and driver-facing cameras available
- ▶ 720p high definition video, recorded at 12 frames per second
- ▶ Driver-facing camera with infrared technology for recording in low light

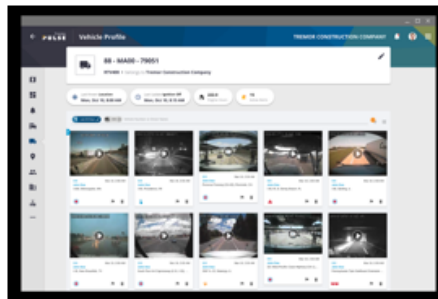

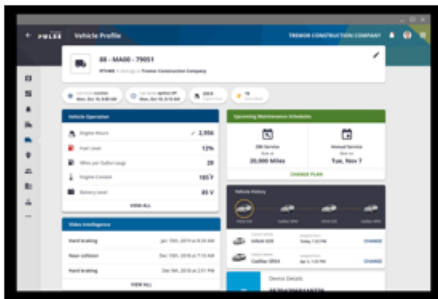

## DIGITAL VIDEO RECORDER (DVR)

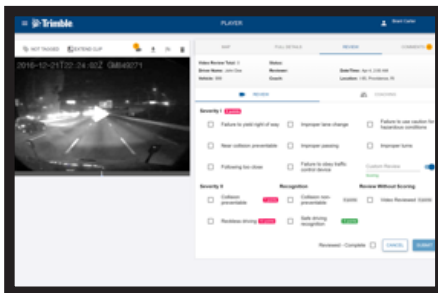

- ▶ Easy install and activation
- ▶ More than 40 hours of video storage (32GB)
- ▶ Equipped with a 32GB SD card to retain high definition videos and a second SD card slot for expandable storage
- ▶ 5.5" (L) x 4.8" (W) X 1.6" (H), and mountable anywhere in the vehicle
- ▶ 4G LTE Cellular

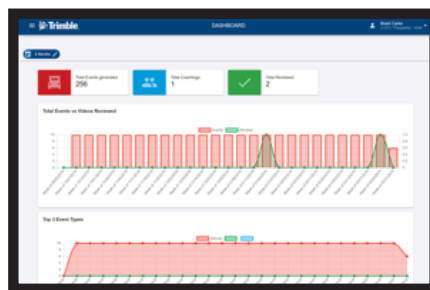

## TRIMBLE PULSE PORTAL

Driver data from entire fleet in one place

Video review on-demand

Reporting dashboards with easy-to-understand and usable data

## ABOUT US

From the field to the office, there's life in your work. A heartbeat that keeps all systems flowing. Our technology connects, monitors, and analyzes the moving parts of your business to make your work smarter, faster, easier, and more profitable. From assets to operations, your work will never skip a beat. That's Trimble PULSE.

The cloud-based portfolio allows Trimble to offer customers industry-specific, enterprise-level solutions for exceptional performance and ease of use.
